

# BACKUP FIREFOX BOOKMARKS

Refer to the “Backup Computer Files” tutorial to review how to save files to HomeDrive. *Note: The screen may look slightly different depending on your operating system, but the process is still the same.*

- 01** Open Firefox. Press **CTRL + SHIFT + B** simultaneously on your keyboard to open the library.
- 02** In the left panel, click on **All Bookmarks**.
- 03** In the menu bar, click on **Import and Backup** followed by **Export Bookmarks to HTML**.
- 04** Save your exported bookmarks to your HomeDrive. When you click on the address bar, it should read “\\Gwfs3.gatewaycc.edu\\HomeDrv\\[Your MEID]”. If it doesn’t, type the aforementioned address and then press **Enter** on your keyboard.
