BACKUP CHROME BOOKMARKS

Refer to the "Backup Computer Files" tutorial to review how to save files to HomeDrive. *Note: The screen may look slightly different depending on your operating system, but the process is still the same.*

01 Open Chrome. Press **CTRL + SHIFT + O** (letter "O") simultaneously on your keyboard to open the bookmark manager.

02 Click on the Organize button (three white dots) located on the right side of the blue bookmarks menu bar. Then, click on **Export Bookmarks**.

03 Save your exported bookmarks to your HomeDrive. When you click on the address bar, it should read "**\\Gwfs3. gatewaycc.edu\HomeDrv\[Your MEID]**". If it doesn't, type the aforementioned address and then press **Enter** on your keyboard.
